Re: Permanente Quarry, Mine ID # 91-43-0004  
Amended Application for Reclamation Plan Amendment

Dear Ms. Hall Esser:

Lehigh Southwest Cement Company (Lehigh) is pleased to submit the attached amended application materials for a Reclamation Plan Amendment for the Permanente Quarry (Quarry). These materials are intended to supplement and amend the information previously filed with the Planning Department in May 2010.

This letter identifies the application materials being provided to the County. A total of ten (10) copies of the application materials are being provided in accordance with the County's past instructions. Each copy of the application includes four (4) binders. The first three binders comprise the Reclamation Plan Amendment and attachments. The fourth binder contains the application materials required by the County. For reference, we have listed the contents of each binder below:

**BINDER 1:**

Reclamation Plan Amendment, Volume 1, with the following attachments:

- A. Legal Description
- B. Revegetation Plan
- C. Geotechnical Report

**BINDER 2:**

Reclamation Plan Amendment, Volume 2, with the following attachments:

- D. Biological Resources Assessment
- E. Hydrologic Investigation
- F. Drainage Report

**BINDER 3:**

Reclamation Plan Amendment, Volume 3, with the following attachments:

- G. Water Quality Analysis
- H. Air Quality Technical Analysis
- I. 1985 Reclamation Plan
- J. Oversize Maps

**BINDER 4:**

Application Materials, including:

- 1. Master Application Form
- 2. Project Description
- 3. Application for Environmental Clearance (with attachments listed below)
  - Environmental Information Form
  - Addendum (Includes Exhibit A, Photographs of Structures; Exhibit B, Woodland Impacts)
- 4. Amended Site Plans, 24x36 size
- 5. Amended Site Plans, 8.5x11 size

We would be pleased to provide additional copies of any of these materials on request. The County also has requested copies of all foregoing in electronic format (discs), which are attached.

Finally, as before, we want to bring two additional items to your attention relating to the application materials. First, the County's Surface Mining and Land Reclamation Standards indicate that the application should include a mining harvest plan and an operational statement. The accompanying materials include all of the information contained in the County's Standards. Second, the Standards also indicate that a Geologic Review is necessary. This requirement is satisfied by the attached Geotechnical Report, which as referenced above is part of the Reclamation Plan Amendment.
